

SOLIS IT SOLUTIONS

INTELLIGENT SURVEILLANCE SYSTEM

WHAT WE DO

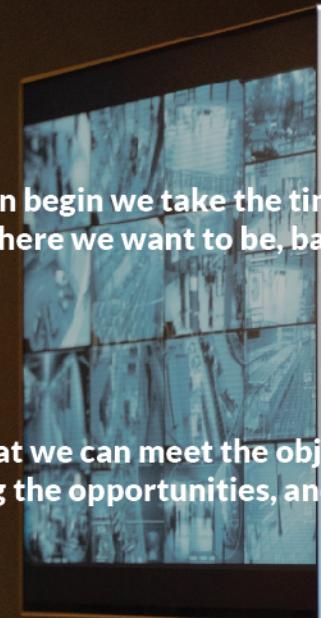

Phase 1

The Current State

Before any journey of change can begin we take the time to understand where we are and where we want to be, based on the business requirement.

The Strategy

Creating plans and actions so that we can meet the objectives of a more digital future, realising the opportunities, and protecting from the threat.

The Roadmap

The roadmap for change, that integrates with your workforce, existing ecosystem and business processes.

HOW WE DO IT

Phase 2

Product & Service Design

Delivering value to your business through innovating or improving systems, communication, and components of service across every touchpoint.

System Integration

The holy grail to efficiency is a robust system providing operational support, live data and intelligence to take informed decisions and actions.

Analytics

The ability to extract actionable intelligence from ever-increasing volumes of video data with accuracy and speed becomes critical for proactive monitoring and advanced surveillance.

OUR DELIVERABLES

01 Hardware

AI IoT Cameras
Smart Network Video Recorder
Cables & Accessories
Display Screens

02 Software

Video Management System
Analytics Tools
Admin Dashboard

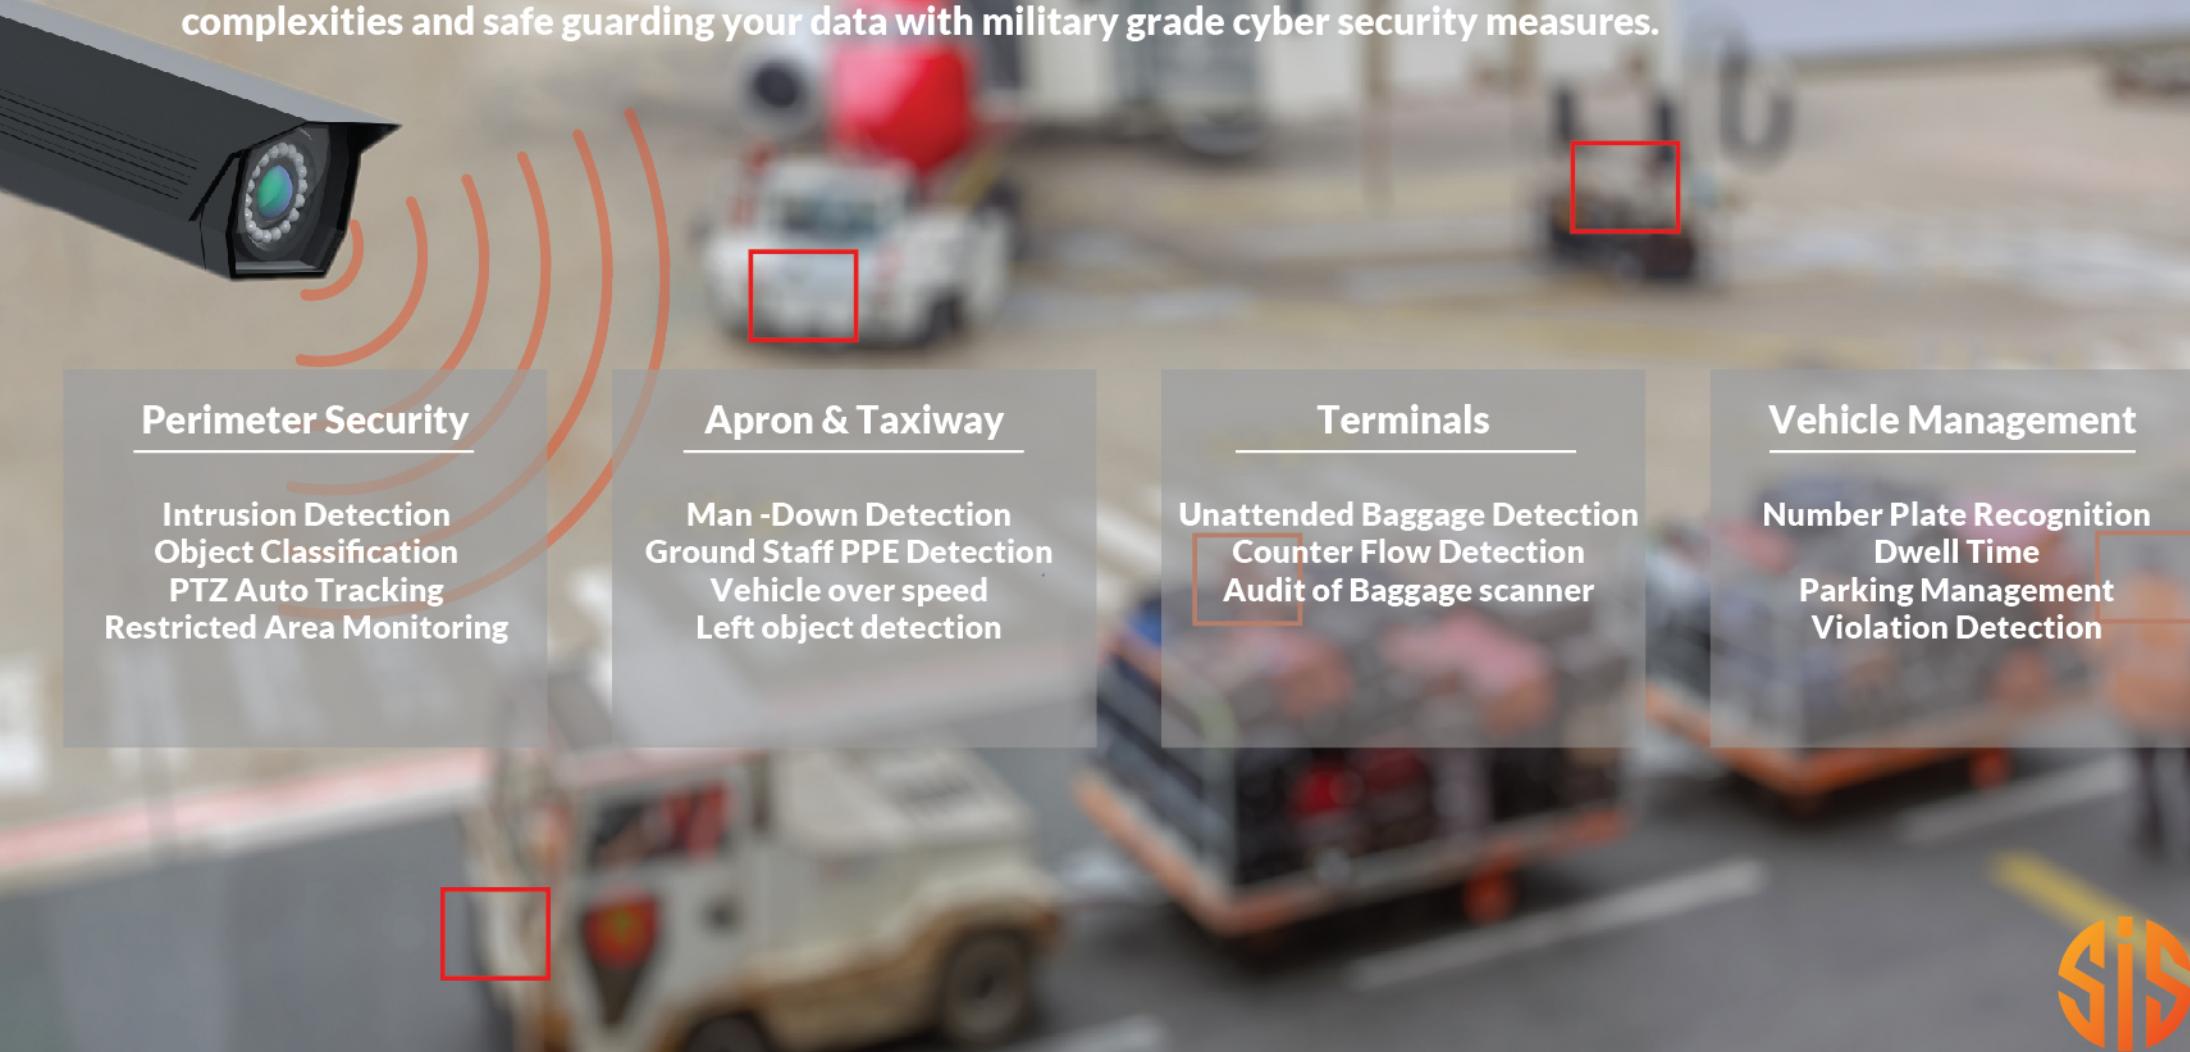

03 Services

Server Rack Management
AMC
Training

INTELLIGENT SURVEILLANCE

Tackle airport threats with technology of future. Managing critical assets, complexities and safe guarding your data with military grade cyber security measures.

INTELLIGENT ANALYTICS

Airports are the critical infrastructures that play a pivotal role in a nation's development. Authorities need a powerful solution for round the clock functionality, identifying threats and resolving them quickly for uninterrupted operations.

With AI powered aviation solution authorities get empowered with robust intelligent insights with zero downtime.

iDS-7600Nxi-I2/8P/X (C) DeepinMind Series NVR

Key Feature

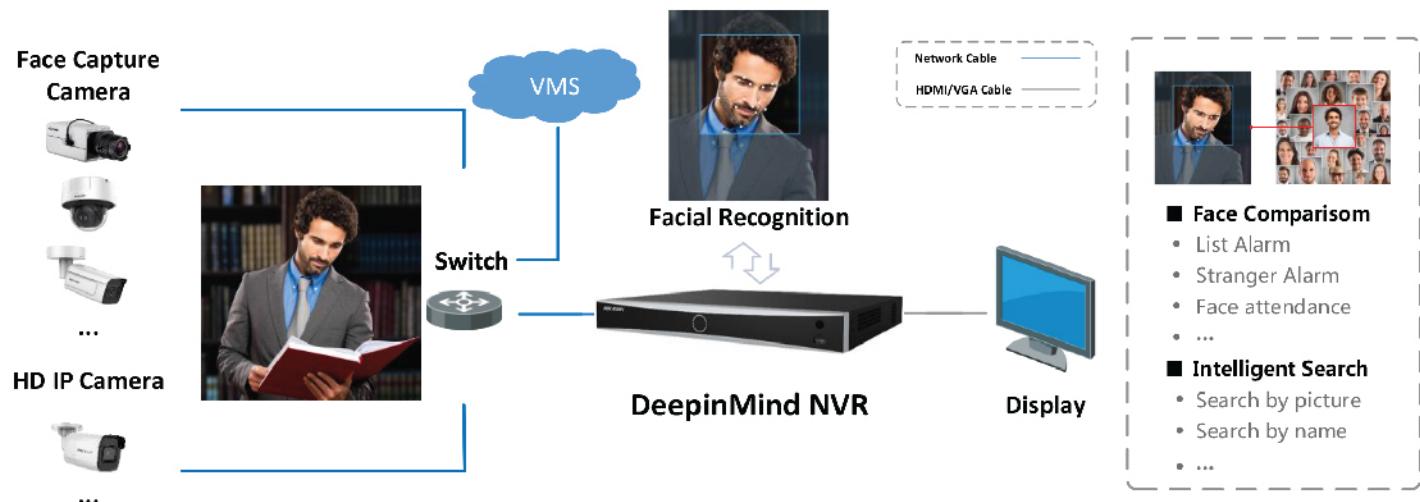

- H.265+/H.265/H.264+/H.264 video formats
- Intelligent analytics based on deep learning algorithm
- Up to 8-ch perimeter protection
- Up to 8-ch facial recognition
- Up to 4-ch video structuralization
- Up to 4-ch throwing objects from building
- Up to 8-ch IP cameras can be connected
- Up to 16-ch 1080p decoding capability

Typical Application

Facial Recognition and Face Picture Comparison

Modeling and analyzing face pictures captured by cameras. Realize list alarm and stranger alarm via face picture library. Search target people by picture and name features.

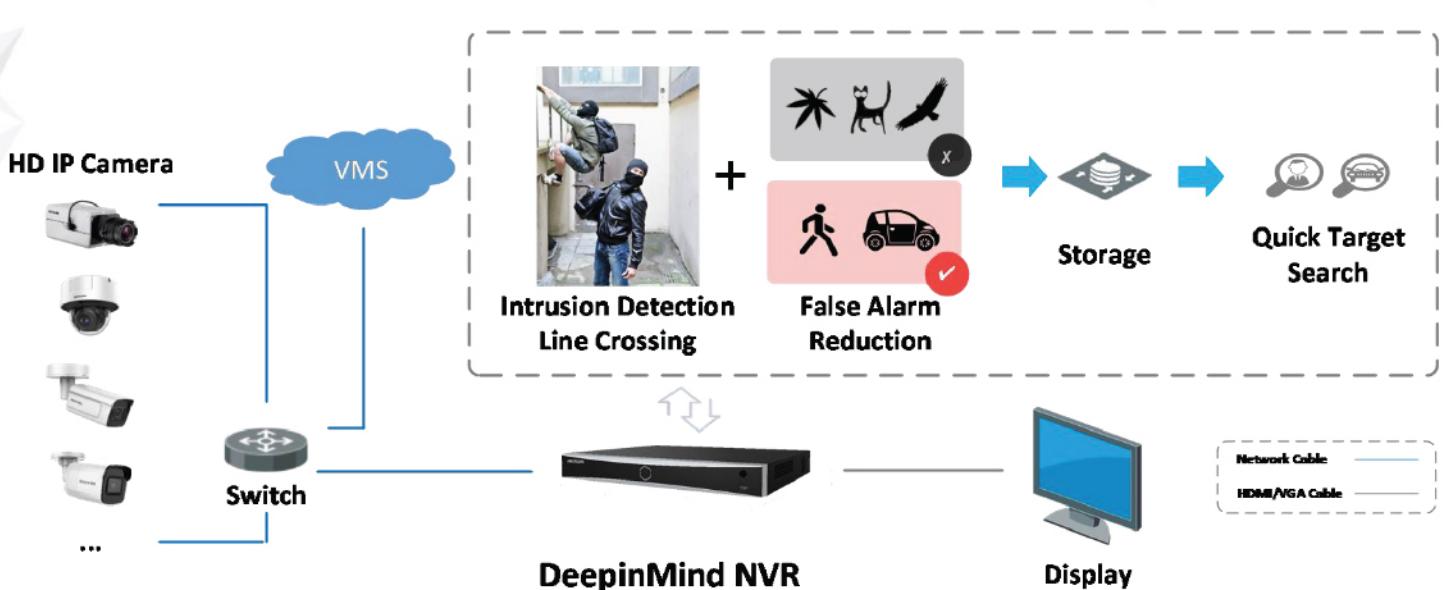

Perimeter Protection

Adopt deep learning algorithm to reduce false alarm, effectively reduces the false alarm caused by tree branches, leaves, shadow, light, vehicles, small animals, etc.

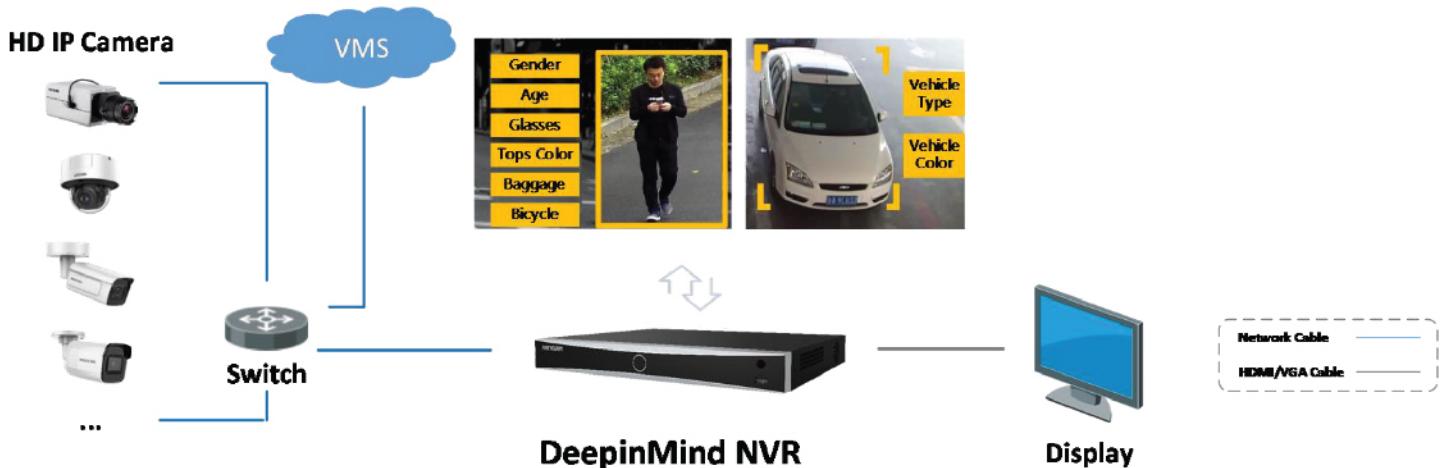

www.hikvision.com

Video Structuralization

Extracting the face picture, human body and vehicle features from live videos, which is used for the tracking and retrieval of human and vehicles.
